PROTECTOSEAL
Safety Without Compromise

The safety experts

Protectoseal has worked closely with some of the world's leading petrochemical producers to develop a range of conservation and emergency vent, tank blanketing and explosion protection equipment.

Petrochemical manufacturers are facing increasing regulatory pressures that demand all storage tanks be fitted with adequate

means of operational and emergency venting, and explosion protection devices for use in potentially combustible atmospheres and that may be subject to BLEVE (engulfment by fire) incidents.

See below for a wide range of products with the following approvals; FM, UL, USCG & ATEX.

1

In-Line Detonation Arresters
UCA

2

End-of-Line Deflagration Arresters
EVA

3

In-Line Deflagration Arresters
LCA

In-Line UCA

HEDS®
High Energy Dissipation System

Tank Blanketing Valves
20

Emergency Relief Manhole Vent
51700

Pressure & Vacuum Conservation Vent
8540H/8540G
